

Disaster Services Disaster Services Technology - DST 101 Classes 2010 Training Schedule

The DST Team at the Greater Houston Area Chapter will be offering in person versions of the DST 101 classes throughout 2010. These classes are open to all individuals in the DSHR system. See below for how to register.

COURSE LISTING

- DST 101 Overview** **TOV1 / DSMSS110W**
 Course gives a brief overview of the overall DST Activity and the various functions of it. This course is a prerequisite of all other DST 101 courses. FOM (Fulfilling our mission) is the prerequisite for this course.
- DST 101 Customer Service (RCS)** **TCS1 / DSMSS111W**
 The customer service activity deals with the overall equipment inventory, customer support, and other areas.
- DST 101 Networking (RNT)** **TNT1 / DSMSS112W**
 The networking activity is responsible for the planning, installation, and maintenance of the network infrastructure and wiring. This also includes the Vsat systems and other components.
- DST 101 Computer Operations (RCO)** **TCO1 / DSMSS113W**
 Computer Operations is responsible for the deployment of the various computers and servers used on a disaster operation, as well as providing basic user support in their operation.
- DST 101 Communications (RCM)** **TCM1 / DSMSS114W**
 The Communications function is responsible for communications equipment to include cell phones, satellite phones, and the various radio equipment used on a disaster operation.
